

Distribution Stringing Rollers

5386 Aerial Cable Roller

The No. 5386 Aerial Cable Roller is designed for mounting directly onto 3/8" to 9/16" messenger wire using a unique clamp type arrangement. The large wide throat and sheave will accommodate most all large conductors.

The yoke assembly is equipped with a hot stick ring and nut assembly for easy opening and positive locking. The sheave is mounted on precision ground Conrad type, permanently lubricated and sealed, maintenance-free ball bearings.

Frame and sheave are light weight, high strength 356-T6 aluminum alloy. All ferrous parts are electro zinc plated. Sheaves may be ordered with permanently bonded conductive neoprene or urethane lining.

Safe Working Load is 5,000 pounds.

Weight: 15 pounds.
