

Universal Stringing Roller Adapters & Dumping Stringing Roller Adapters

5927 Adjustable Insulator Adapter

An infinite angle roller with adapters and fittings for a wide variety of conductor stringing applications

The No. 5927 Adapter is used on vertical or horizontal tie top insulators in conjunction with Lindsey's No. 5902, 5902-B and 5903 Rollers and may be installed at angles of 15°, 45° & 90°.

(Note: the 5902 and 5903 require No. 5906 Angle Attachment to be installed at 90°.)

The adapter is furnished with neoprene neck liners permanently bonded and molded in place to protect the insulator from damage while providing a tight grip on the insulator neck and will fit neck sizes 2 1/8" to 3 1/2" diameter. The conductor may be energized while in the roller.

The No. 5927 Adapter features heavy duty 1 1/2" threaded adjustment rods protected from damage if dropped from the pole by the large casting that clamps on the insulator neck.

Materials are lightweight high strength 356-T6 aluminum alloy, all ferrous metals electro zinc plated.

Safe working load is 2,500 pounds.

Weight: 4 pounds.
