

Distribution Specialty Stringing Rollers

5333 Flat Groove Angle Stringing Roller

The No. 5333 was designed specially for stringing up to 3-inch wide flat conductor. A unique pivoting feature allows the sheave and spring-loaded keeper to follow the conductor through a 180° arc. Supplied with a 48 inch chain and hook for pole mounting, the No. 5333 can also be suspension mounted without removing the pole bracket or chain. The sheave has a 2 1/2" I.D., 6" O.D. and is mounted on oil impregnated bushings for a long, maintenance-free operating life. Parts are lightweight 356-T6 aluminum alloy with a ductile iron pole bracket and steel chain. Weight is 11 lbs.
